

PRODUCTS	BASE	USE
DUKOIL EPL PLUS	Mixture of oils and paraffins.	Used to receive a strong Pull-Up effect on full grain leather and buffing leather. Leather is soft and full to the touch: the color is darkened considerably.
DUKOIL S 40	Mixture of waxes.	A mixture of very hard waxes. DUKOIL S-40 most prominent qualities include: good penetration, good Pull-Up effect, shine, easy to polish and dry finish.
DUKOIL S-60	Mixture of oils and waxes.	DUKOIL S/60 gives leather a strong Pull-Up effect. Leather is soft and full. The Pull-Up effect does not fade in shoe manufacturing companies using heating stalls.
DUKOIL S 308	Synthetic waxes.	Used to receive the Pull-Up effect on full grain leather as well as corrected grain leather. Gives a medium shine, while simultaneously "closing" the grain. Product is resistant to washing in temperatures of 40 degrees Celsius.
DUKOIL S 310	Synthetic waxes.	Used to receive a very strong and dark Pull-Up effect. After breaking the effect is of brilliant luster.
DUKOIL ST 100	Natural and synthetic waxes and oils.	Used for polished and full grain leather to achieve the popular SNOW effect.
WAX BLACK	Mixture of special waxes and dyes.	Gives a great Pull-Up effect on full grain leather as well as corrected grain leather. It is very important to completely dissolve and mix the product prior to application.
